- CONTRIBUTION RATE The tax rate assigned to each employer under provisions of the Maine Employment Security Law. Rates are usually in effect for a calendar year and are applied to taxable wages to determine contribution due. An employer's contribution rate is generally based upon the specific rate schedule in effect and the firm's experience with unemployment. This experience is measured in terms of the benefits paid and contributions received from the employer in relation to his average taxable payroll. Rates are also based on total wages but these are for analytical purposes only and have no statutory basis.
- CONTRIBUTIONS DUE The state unemployment taxes assessed to covered employers for payments made for deposit in the Unemployment Trust Fund. Contributions are based on a tax rate schedule that is applied to taxable wages. Contributions are due on or before the last day of the month following the close of each calendar quarter. Contributions due for a year are usually received during that same year except in the case of the October-December quarter when they are received in the following year.
- CONTRIBUTIONS RECEIVED That portion of state unemployment taxes paid by employers during a calendar year. Not included as contributions are payments made in lieu of contributions by employers under the direct reimbursable provisions of the Maine Employment Security Law.
- COVERED EMPLOYMENT The number of workers of those employers subject to the Maine Employment Security Law. The data relating to covered employment are for weekly pay periods which include the 12th of each month. Included are all corporation officials, executives, supervisory personnel, wage earners, piece workers, part-time workers, and people on the payroll but on paid vacations. Similar employment data for federal government installations within the state are also included. See Section IV for further explanation.
- DEPENDENTS ALLOWANCES The supplemental amount payable for a week of total or partial unemployment insurance benefits to individuals with dependents.

Maine	Departmen	t of Labor

The federal tax rate increases by 0.3 percent each year until the loan is repaid in full.

MASS LAYOFF STATISTICS (MLS) PROGRAM

INDUSTRY DESCRIPTION All descriptions and totals are based on the North American Industry Classification System (NAICS). NAICS groups employers into industries based on the activities in which they are primarily engaged.

INITIAL CLAIM See Claims for definition. These initial claims only pertain to confirmed mass layoff events which were reported under MLS.

MASS LAYOFF EVENT A confirmed mass layoff event in MLS is defined as 50 or more initial claims (20 or more for a state event) filed against an establishment during a 5-week period, with separations lasting longer than 30 days as specified by the employer during the employer contact.

PRIMARY REASON FOR SEPARATION The principle reason for a layoff event, as reported during the employer contact.

SEPARATION/LAYOFF The number of individuals who have become permanently displaced during a particular layoff event, as provided by the employer during the employer contact. The number of separations, as reported by the employer, may exceed the number of initial claims shown for an event. Separations include only those that will be out for 30 days or more.

TOTAL ESTABLISHMENTS A subset of employers subject to the Maine Employment Security Law with 15 or more employees.

- METROPOLITAN STATISTICAL AREA (MSA) A large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. In New England, MSAs are composed of cities and towns rather than entire counties as in other areas of the United States. To qualify as an MSA in New England, an area (made up of a central core and outlying cities and towns) must contain a city of at least 50,000 people or have a total population of at least 75,000.
- MICROPOLITAN STATISTICAL AREAS A nonmetropolitan region or group of adjacent nonmetropolitan regions that contains an urban cluster of 10,000 to 49,999 persons. A micropolitan statistical area may include surrounding regions if there are strong economic ties between the regions, based on commuting patterns. In New England, cities and towns, rather than counties, are used to define micropolitan statistical areas. Nonmetropolitan cities and towns that are not classified as part of a micropolitan statistical area are considered nonmicropolitan.
- MONETARY ELIGIBILITY REQUIREMENTS The employment and wage requirements necessary to establish entitlement to compensation under the Unemployment Insurance program.

BASE PERIOD WAGES The minimum amount of wages that must be earned during a four consecutive calendar quarter period for benefit entitlement.

WAGES IN TWO QUARTERS The minimum amount of wages that must be earned during at least two of the four consecutive calendar quarter period for benefit entitlement.

APPENDIX C. NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM

The North American Industry Classification System, more generally referred to as NAICS, has replaced the Standard Industrial Classification System (SIC). NAICS is an outgrowth of the North American Free Trade Agreement of 1993 and was designed to standardize the industrial classification of establishments in the United States, Canada and Mexico. Beyond this objective, NAICS allows for the inclusion of more new industries and production techniques than does the SIC. It is based on how a product is created or a service is provided. SIC stresses final products and services and thus has not kept pace with the structure of the contemporary economy and the "high tech" industrial base.
